

News Release

G3 growth

Quarterly GDP for the US, Euro Area & China

Released: 12:00 BST, 15th September, 2015

Next release: 12:00 BST, 19th October, 2015

www.now-casting.com

G3 growth better than expected

- GDP growth in Q3 2015 for the G3 – the US, Euro Area and China – is expected to be 3.71% with respect to Q3 2014. Growth in Q4 is expected to be slightly higher, at 3.79%, on the same basis. This indicates a stable quarterly growth rate, close to the likely out-turn for the full year of 3.84%
- Expected growth in Q3 and Q4 is higher for the G3 overall than anticipated a month ago, reflecting improvements in both the US and Euro Area, partially offset by a marginal decline for China. However, these changes are partly due to official revisions to prior period GDP figures in both the US and Euro Area

GDP growth for the 'G3'

Year-on-year % growth rates

Changes since last month

Year-on-year % growth rates

		2015 Q3	2015 Q4
G3	Last month's prediction	3.51	3.64
	This month's prediction	3.71	3.79
	Change on month	0.20	0.15
US	Last month's prediction	1.81	2.00
	This month's prediction	2.27	2.35
	Change on month	0.45	0.34
Euro Area	Last month's prediction	1.41	1.42
	This month's prediction	1.63	1.62
	Change on month	0.22	0.20
China	Last month's prediction	6.75	6.92
	This month's prediction	6.68	6.84
	Change on month	-0.06	-0.08

Notes

Release dates In January, April, July and October, G3 GDP estimates are published on the same day as the official publication of GDP growth in China; in February, May, August and November G3 GDP estimates are published on the same day as the flash estimate of GDP growth from Eurostat, and on other months they are published on the 15th of each month or the first working day thereafter.

Growth rates All quarterly growth rates mentioned in this release are calculated on a year-on-year basis: comparing the reference quarter with the same quarter in the previous year

Weights The US, Euro Area and China are weighted by their share of G3 total GDP in 2014, according to the IMF World Economic Outlook April 2015 database, using current international dollars, at purchasing power parity

Sources The US Bureau of Economic Analysis; Eurostat; National Bureau of Statistics of China; IMF World Economic Outlook database; Now-Casting Economics Limited

Now-Casting model All forecasts in this release are from the Now-Casting statistical model, which is designed to capture commonalities among macroeconomic data while filtering out idiosyncratic noise. The model produces estimates of the real economic conditions in different countries in real time, taking into account non-synchronous data sampled at mixed frequency. Forecasts are produced automatically, without judgment or other intervention. The deep parameters of Now-Casting model are re-estimated at the beginning of every year

Now-Casting Economics Limited is a company delivering high-frequency information on current conditions in the world's major economies. The service covers the US, the Euro Area, China, Japan, Germany, France, Italy, Spain, the UK, Canada, Brazil, Mexico and South Africa and is available by subscription. Weekly now-casts for the Euro Area are available free on the Now-Casting web site (www.now-casting.com).
